

How do I recover my Onchain account?

Step 1: Understand the Difference Between Onchain wallet and Onchain wallet Exchange

Onchain wallet is self-custody meaning you own your private keys. The wallet itself cannot directly deposit USD to your bank. To access cash:

- You either send crypto to a fiat-supporting exchange like

Onchain wallet.com

Onchain wallet, Binance, etc

- Or use a peer-to-peer or crypto debit card service that supports wallet withdrawals

This distinction is critical: attempting to “cash out” directly from the wallet app without using

an exchange won’t work.

2: Send Crypto to an Exchange That Supports

Bank Withdrawals

1. Open Onchain wallet

2. Tap Send

3. Enter the deposit address of your account on Onchain wallet.com
